CUSTOMER SCIENCE

dunnhumby's customer science business model revolves around the customer, helping companies predict and meet the needs of their best customers.

Analysing data from **nearly one billion customers** worldwide, we uncover valuable insights: what customers want, where they want it and how much they're willing to pay for it. Then we turn those insights into action, offering personalised experiences, in and out of store, online and off, before, during and after the trip, earning their lasting loyalty.

Additionally, we use these insights to transform clients into customer-first organisations. By putting best customers at the centre of every decision, our approach delivers measurable value, competitive edge and even more customer data to fuel ongoing optimisation, setting clients up for long-term success.
